

FOR IMMEDIATE RELEASE – June 2009

SKIDATA's PARCS Installed at the City Creek Center's Mixed-use Garages

Salt Lake City – SKIDATA phases in a tiered parking system at the City Creek Center. Striking a balance between the three types of end-users—condo-Residents with monthly parking tags, Staff at surrounding firms who need daily parking permits, and Visitors to the shops who want quick-and-easy hourly parking, is one of SKIDATA's core strengths. Our systems allow Operators to handle complex integrations—accommodating every user-type and using third-party tools—with hardware and software able to fit the bill.

The men behind the City Creek Project: Damon Kessler (Regional Manager-Protection Technologies), Ali Khaksar (President - TagMaster), and Wade Brossow (President-Protection Technologies)

For the mixed-use City Creek Center Project in the heart of Salt Lake City, SKIDATA's Distributor, Protection Technologies, initiated Phase 1 of the project. They installed the first phase of the 4-year project using SKIDATA parking technology with TagMaster's AVI System. The 112-lane system at Blocks 75-76 uses 30 SKIDATA Entry/Exit Columns and 70 SKIDATA Gates with AVI Readers.

Damon Kessler, Regional Manager at Protection Technologies, noted that the initial City Creek Center installation is scheduled for completion in January 2010 and includes a wide variety of PARCS technologies:

- SKIDATA entry and exit columns using TagMaster AVI at garages, as well as for access-control in nested areas
- SKIDATA entry gates with TagMaster AVI plus exit gates
- VMWare High-Availability Redundant Backend
- Plans to include Power.Cash Automated Paystations

View of the finalized City Creek Project.

Ali Khaksar, President-TagMaster, mentioned how the Project uses LR-3 Readers with Watchman firmware that are fully compatible with SKIDATA systems. Over 3,000 semi-passive tags will be used at City Creek Center entrances and exits at full occupancy.

In short, the City Creek Center's parking system is an excellent example of how to integrate blended residential-commercial access and parking systems for a phased-in municipal project. Protection Technologies has done an exceptional job in handling the project to the customer's satisfaction.

About SKIDATA

SKIDATA, Inc., established in January of 2000, is located in Hillsborough, NJ and is a wholly owned subsidiary of SKIDATA AG. SKIDATA AG is an international market leader in access and ticketing systems for parking facilities, airports, shopping centers, sports/event stadiums, and amusement parks.

SKIDATA's client portfolio includes some top names in every sector and key clients in vehicular access. Currently over 4,500 SKIDATA applications are being operated successfully in over 30 countries worldwide. SKIDATA is a Kudelski Group Company (www.nagra.com), a world leader in digital security technology. Kudelski SA is traded on the Swiss Stock Exchange (SWX "KUD").
