PRODUCT SHEET

ACTS

Access Control Tracking System

Advanced Version

ACTS is an embedded access control software solution for TagMaster long-range RFID readers available from TagMaster North America. This advanced Automated Vehicle Identification (AVI) solution offers enhanced features such as anti-passback capability, customizable schedules, reports, Data integration and reversible lane control integrated with traffic light using web-enabled interface.

Reversible Lane Control integrated with traffic light and Vehicle Counter Display

Reversible Lane control in which traffic may travel in either direction, depending on certain traffic flow during the rush hours, by having traffic lights signs notify drivers which lanes are open or closed incorporated with Vehicle Counter Display.

Anti-Passback Technology

Combined with networked RFID readers, ACTS ensures RFID tags are read only once and cannot be read and passed back to other users. Integration with inductive loop vehicle detectors ensures secure lane control.

Customizable Schedules and Reports

Scheduling access to facilities has never been easier through the custom web interface. Set multiple schedules including holiday and weekend schedules. Reports include standard personnel, tag, event and real-time facility use reporting along with customizable individual personnel, tag and date reporting.

Web-Enabled Interface

ACTS' easy-to-use web-enabled interface allows administration of the system from anywhere using any popular web browser. Using this interface, the user can perform configuration tasks such as: opening/closing gates or barriers, administering personnel and schedules in real-time and customizing up-to-the minute access reports.

Data Integration

JSON and XML support for data integration functionality built into ACTS through the JSON and XML interfaces which makes ACTS a viable choice for complex back end applications.

KEY FEATURES

- | | |
|---|---|
| <ul style="list-style-type: none">• Embedded in TagMaster RFID Readers• Supports anti-passback, ground loop and keypad• TCP/IP enabled, works in DHCP/Static IP environment• Easy-to-use web-based interface• English and Spanish Language Support• Real-time event log viewer | <ul style="list-style-type: none">• Flexible scheduling scheme• Downloadable/Customizable reports• Store 5,000 events per day for 4 years• Manage over 10,000 cardholders/credentials• Database backup and restore features |
