**Access Control Tracking System**

**Handheld (HR-2) Version**

Access Control Tracking System (ACTS) Handheld is the access control and tracking application software for TagMaster North America's handheld reader (model HR-2). ACTS Handheld is used to scan tags to verify the validity and correct location of the vehicle.

### **Event Messages**

Parking patrols scan a tag with the HR-2 and are given a message of Passed, Wrong Floor, Inactive Tag, Expired Tag, or Unknown Tag.

### **Fully Compatible with ACTS Essential**

Using the Ethernet connection, the handheld personal database can be synchronized with an existing ACTS Essential database.

### **Easy to Use Interface**

From the host computer, system administrators are able to Add Tags/Identification, Edit Information, Delete Personnel, Change Schedules, View Reports, and Backup/Restore Database.

### **Key Features**

- |   |  |
|---|--|
| <ul style="list-style-type: none"><li>• Downloadable/Customizable reports</li><li>• Real-time event log viewer</li><li>• Database backup and restore features</li></ul> | <ul style="list-style-type: none"><li>• View over 10,000 cardholders/credentials</li><li>• Store 5,000 events per day</li><li>• Flexible scheduling scheme</li></ul> |
